

PRESTIGE WORLDWIDE TECHNOLOGIES – UNITED STATES MASTER DISTRIBUTOR ANNOUNCEMENT

28 OCTOBER 2020

We are delighted to announce the appointment of Prestige Worldwide Technologies as our exclusive master distributor of Technolog products for the United States. They will be taking care of the promotion, supply and support of our innovative range of battery powered data loggers and pressure control products for deployment in water distribution networks.

Prestige WWT is expanding their current operations to provide direct sales, engineering support and technical expertise to all our existing customers and will help to identify, establish and support new regional distribution channels.

Prestige WWT maintains two fully stocked warehouses that are centrally located, where most orders can be processed and shipped within 24 hours.

Sales are complimented by nine fully stocked service vehicles ready to provide expert on-site services, ensuring that any repairs, installations or rebuilds are done in a timely manner without interruption of critical services.

Prestige WWT has been active in the sale and service of Automatic Control Valves (ACV), packaged PRV stations and meter certifications for over 20 years with a combined experience of more than 50 years. Their northern and southern divisions merged in January 2018 to create the largest ACV service provider in the nation!

“We are very excited to team up with such a key local player within the water industry, one that mirrors our own company values.”
